

Our range of well equipped fabrication workshops and skilled tradesmen place Ross-Shire Engineering in an ideal position to deliver full specialist cross-sector fabrication support.

From full design and build fabrication projects, batched production or simply one-off items, the business is responsive to customers' requirements.

Whether for the Hydropower or Industrial Sector, against tight deadlines in the Oil and Gas Sector, or modular build solutions for Utility Markets we offer first class workmanship and a keen focus upon delivery.

Delivery includes full HSEQ compliance and materials traceability.

Our fabrication services are delivered to a range of blue chip clients, often driving different approaches, welder codings or governance dependent upon the regulatory frameworks within which our clients operate.
